**Subject:** Mandatory Meteor meeting Monday, June 26

**Importance:** High

Hey folks, we **MUST have Brad, Pam S, and Pat T in the room at GEF 2 on Monday June 26.** It appears the next Meteor submittal is coming in **today.** I've made it clear to Admin that there is no way we can have the new submittal reviewed by Monday, and that it will be necessary for Meteor to go over what they changed in the plan in order to address the permit conditions.

That said, there's an expectation that we will drop everything to begin diving in to our review as soon as the submittal reaches us, attend Monday's meeting to listen and ask any clarifying questions based on what we are able to review before Monday, and then finish our review ASAP after Monday's meeting. That means Bart Chapman must be made available to assist in the engineering part of the review.

After Monday's meeting, DNR staff should huddle to discuss review logistics. I can reserve a room in GEF 2 for staff to use until review is complete, OR I can reserve a meeting time (skype and conference room) mid-week for us to get together, discuss observations and make any course corrections as needed.

Please call me with any questions/concerns. 608-220-8440

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
