AN ACT to amend 6.86 (1) (ac) of the statutes; relating to: absentee ballot request and return confirmation.

Analysis by the Legislative Reference Bureau

Current law allows a voter to receive an absentee ballot by making a written application by means of facsimile transmission or electronic mail. Under this bill, if a voter makes a written application by electronic mail and submits his or her mobile telephone number with the application, after the voter completes and submits the application, the electronic application system maintained by the Elections Commission must automatically notify the voter by text message that his or her application has been received. In addition, under the bill, after the voter completes and returns his or her ballot, the system must automatically notify the voter by text message that his or her ballot has been received. Finally, the bill provides that all mobile telephone numbers submitted for the purposes provided under the bill are confidential.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
