

Koshkonong Solar Energy Center

The Koshkonong Solar Energy Center is a proposed 300 megawatt (MW) solar power generation facility in Dane County, Wisconsin, targeted to begin operating in 2024. Solar technology uses the power of the sun to deliver clean, renewable energy and is now one of the lowest-cost energy sources available. Koshkonong Solar will also include a 165 megawatt (MW) battery storage component that will help ensure grid reliability. Advanced energy storage is a rapidly evolving technology sector critical for 21st century electricity grids.

Enough sustainable energy to power **60,000 American homes**

An estimated **\$200 million invested** in the Dane County economy over the life of the project

An estimated **600 construction jobs** supported during peak construction

Up to **5 full-time operations and maintenance jobs** created once operational

Emissions reductions equivalent to taking **145,000 cars off the road**

Supports local education, emergency & veteran services and environmental stewardship

Uses the most up-to-date, innovative technology

165 megawatts of advanced energy storage

Development Timeline

2019–2022	2022-2024	2024
Development Activities include engineering, environmental studies, permitting, interconnection studies, etc.	Construction Timeline subject to change	Operation

Invenergy's Grand Ridge Energy Center located in LaSalle County, Illinois.

A Proven Track Record in Sustainable Energy Development

Invenergy is America's leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$216 million annually in the home communities where its projects are located.

Invenergy has successfully developed 180 projects, totaling over 28,000 megawatts, including wind, solar, natural gas power generation and advanced energy storage projects.
